

Ques Delete middle node

- ① Calculate size
  - ② go to  $\lfloor \text{size}/2 \rfloor$  node
  - ③ Delete next node
-

# Ques Reverse a Doubly LL

```
public static Node Reverse(Node head) {  
    while(head != null) {  
        // swap prev and next  
        Node nextNode = head.next;  
        Node prevNode = head.prev;  
        head.next = prevNode;  
        head.prev = nextNode;  
        if(nextNode == null) return head;  
        else head = nextNode;  
    }  
    return null;  
}
```

nn = null

pn = 5k

10:20

Ques DLL  $\rightarrow$  delete  $k^{\text{th}}$  from end

Size = 5

$k = 2$

---

Ques 4 algorithms to reverse a singly LL

## ① Reverse Data Iterative

↑  
head

// Calculate Size

```
int size = 0;
Node t = head;
while (t != null) {
    t = t.next;
    size++;
}
```

```
int l = 0, r = size - 1;
```

```
while (l < r) {
```

```
    Node ln = get(l); // O(n)
```

```
    Node rn = get(r);
```

```
    swap(ln, rn);
```

```
    l++; r--;
```

}<sup>n</sup>

TC =  $O(n^2)$
